INTEREST IN THE CASE.

MUCH PROPERTY WILL BE IN-VOLVED IN THE DECISION.

Exect G. Rognon Returns From Southeastern Utah-Colorado Riv-Placers Being Extensively

In their answer to the complaint recently filed against them by the owners of the Geyser group in the Camp Floyd district, the Marion people will comp practically all of the allegations men on and are taking out a little ore, made by the plaintiffs and rather turn more than day's pay. They have about the tables on the other side. This answer is now in course of preparation swer is now in course of preparation. The Swansea shipped a car of ore on and will be filed in the District court Monday which averaged eighty ounces within the next few days. Naturally silver. They are working eight men on enough the people interested in the that property and expect to continue district are awaiting with great interest and not a little anxiety for the filing of the reply to the allegations made by Gisborn and his associates, in their low grade ore. They have about order that they may determine just forty tons of first-class ore ready for what ground is taken by the Marion shipment.

Today to not not ready for what ground is taken by the Marion shipment.

Six men have been put to work on the Sunbeam and that number will deal of the future litigation of the disprobably be increased. They are build-trict; and there will be plenty of it, if ing a new shaft and ore house and prothe present indications are to be accorded.

Today is nay day at the Manmoth After stating the case and entering

After stating the case and entering denials to the allegations as to ownership, the plaintiffs will take the position that they had a perfect right to follow their vein, which has its apex on their ground, the Marion, on its dip and out through the side lines of the Marion to any point they saw fit. In this case the tunnet, from which considerable of the Marion ore has a risken, cuts the side lines of the Marion in following the vein, which pitches downward and to the south, and passes under the Florence No. 3 and into the Geyser. The complaint will set up that the Florence is not patented, but is claimed by both the plaintiffs and the defendants, being even now in the courts for settlement, and that the vein which has its apex on the Marion is extremely well de-

and that the vein which has its apex on the Marlon is extremely well defined and has a very heavy dip.

It is understood that the Geyser people will ask for undersround surveys of the properties involved when the case is called in court and to this the defendants will offer no objection. They have known where "they are at since the opening of the property. At since the opening of the property. At They have known where "they are at" since the opening of the property. Although the matter has not as yet become public property the statement has been made that the trial of the case will develop some sensutions. The plaintiffs are said to be provided with experts who will swear that the Camp Floyd district has no gold weins, but that, on the other hand, all of the so-called veins are nothing more or less than deposits. This would complicate matters considerably, but the defendants are ready to meet the other side on that point and declare that they will show beyond question of a doubt the rold ore is taken from well had veins with dips, faults and walls.

e general opinion among the min-men of the district seems to be the Marton will ultimately win

COLORADO RIVER PLACERS. They Are Being Worked Quite Ex-

tensively Says Mr. Rognon. Ernest G. Rognon, of the Pan-Amuel can Mining and Milling company and the North Fork Placer Mining com-

Pinos reservation in Colorado had just commenced and time led to the sensytional stories sent out by the people of the southeastern part of the territory. The gentleman does not think that the Indians have any evil intention but their first need will be water over as soon as enough their own ranges in Colorado are rought stricken and unable to support the ponies, sheep and goats. The change to this territory was made in order that the animals might find food. This is, of course objected to by the camboys and many of the other settler, and some treuble may be precipitated. Mr. Regnon is of the opinion that the red men will 60 no other damage than kill the game in the Blue mountains and secure winter pasturage for their flocks and herds.

OPERATIONS IN TINTIC.

The contract is fulficult, if not impose atout of makes it difficult, if not impose able to the sensy the send of the water. Coloned will be vester. Coloned will be vester. Coloned will be ready ere long to erect mills and daily wraps and closks in endless variety in styles and prices. The special is command to make it a paying in sale in this department is now on. Call and inspect goods and prices before buying elsewhere.

Bullion-Reck Rapidly Getting Its Mill Excavation Completed.

Ten men are employed at the Third ing first rate and states that total shippments for the month will reach 100 tons. The work of excavating for the new mall is going rapidly forward and will be completed in ten days, and the stone work in a week from that time. The carpenters are at work traming the timeers for the nill and will be ready to proceed with the ersetton as soon as the stone work is completed. The massonry work on the reservoir on the divide is nearly finished but the conficient coating. In all probabilities, can not be applied until spring. The Rio Grande Western people are at work grading for the new tracks around the hill from the Keystone to the new millistie and expect to complete the grade within a week, when they will commence moving the mill timbers to that propose to have heir mill working at the earliest possible moment.

In Sunday last Henry Shields, W. I.

Stater, H. M. Ryan and John T. Sullival, of the board of directors of the Ajax stinding company, made a thorough inspection of the company properties at Mammith. They decided to at once commence work on the Phoenix shaft, which is now about 230 feet deep, and sink to the 500 find from that point to cross cut to the point where the ore is exposed in the Champiain. The work on the Potential also be prosecuted as vigorously as possible and the entire force now at work will be kept on one, in order to keep up their regular shipments. The right kind of men seem to be hold of the Ajax and we look for a great record to be made by that company this winter.

The Manusco h Mining company within white is gold-to be hold of the Ajax and we look for a great record to be made by that company this winter.

WATER ASSESSMENTS.

THE CITY COUNCIL HEAKS THE GRIEVANCES OF TAXPAYERS.

the same water had remained for the past four years. He thought there was nothing in the ordnance to war-BOARD OF EQUALIZATION SUG-GESTED.

A Board of Equalisation is Appointed. Which will Meet Next Wednesday Evening and Every Evening Thereafter Till All Complaints Are Disposed Of.

There was a big attendance of kickers at the meeting of the city council last night, as a committee of the whole, held to discuss the matter of over assessment of the water tax. The portion of the new council chamber set aside for the public was tolerably well filled and within the bar were noticed Major Downey, Hyrum Cartwright, of the Z. C. M. I., M. H. Walker, Thomas W. Jennings, F. D. Clift, John Clark, H. C. Walkace, Henry Dinwoody, Orson A. Wooley, Dr. W. H. Groves and to hers. Who appeared in the role of kickers.

Superintendent of Waterworks Dailey thought it would be a good thing for the council to appoint a board of equalization to examine in each case of alleged over assessment and correct any errors. He was anxious that no injustice should be done to any. There were cases where some allowance or rebette might be just, but the law gave the assessor on discretionary power.

Major Downey, representing the Commercial block, said the block had been assessed at \$500 this year against just the same as if they had.

M. H. Walker said the Walker house assessment last year house assessment last year house assessment last year house assessment and correct any errors. He was anxious that no injustice should be done to any. There were cases where some allowance or rebette might be just, but the law gave the assessor on discretionary power.
